

## KANSAS CITY HOTEL SYSTEM—\$10,000,000

Candy Factory, Repair Shops and Laundry Will Be Features.

IS NOT NAMED YET

D. L. Allis, Promoter, Sees Columbia's Need of Train Service.

In connection with the merging of the Hotel Baltimore and Muehlebach in Kansas City, there will be a great industrial plant which will include a laundry, repair shops, renovating shops and a candy factory, according to B. L. Allis, who promoted the scheme.

Mr. Allis, who is the vice-president of the Columbia Hotel Company, is visiting in Columbia last week-end. It was through his efforts that the recent merger in Kansas City was effected. It is his opinion that Columbia's greatest need in the way of public improvements is a railroad and electric connection.

Mr. Allis has been working on the Hotel Merger for three years and the whole plan was his own idea. He says that the new hotel in Kansas City will be twelve times the size of the Daniel Boone Tavern and will have about 2,200 rooms. No name has yet been given to the hotel that being left to the people of Kansas City. Ground will be cleared for the new structure January 1. The total investment of the three hotels will be approximately \$10,000,000.

Mr. Allis said that the emerging of these hotels means much to the public in Kansas City and the state. Big conventions of 3,500 people can then be accommodated, something impossible under present conditions. The new hotel will seek to be an amusement center and will endeavor to bring to Kansas City the best music, art, and amusement.

Mr. Allis besides being a hotel promoter is a newspaper man. He is editor of a publication called "Tavern Talk" which is a hotel trade journal containing news of hotels and hotel men over the entire country. Besides being a printer, editor, and hotel man Mr. Allis has served on several big hotel committees of the country. While on one of these committees, he found that when people were not paying for bread and butter on the hotel menu 100 per cent took the articles with their meals. When they paid for bread and butter only 76 per cent had bread and butter.

In all his traveling Mr. Allis said he has seen no hotel, except in large cities that surpasses the Daniel Boone Tavern. Mr. Allis says that there is now only one thing that Columbia needs and that is a railroad and electric connection. Although Columbia is the greatest institutional center of the state, Mr. Allis says that there is no reason why it is not to be one of the biggest business cities of this state in a short while.

### NOTES

C. B. Rollins, Jr., went to Mexico on business today.

O. A. Marr went to Montgomery City on business today.

Adaline McHolland returned to her home at Chillicothe today after spending the week-end at the Kappa Kappa Gamma house.

## Organization Through Co-operation

THE Standard Oil Company (Indiana) attributes to organization its success in discharging its obligations as a public servant.

The business of the Standard Oil Company (Indiana) is a highly specialized branch of industry, where complete co-operation is necessary to insure maximum efficiency.

Every one of the 22,000 men and women who make up the Standard Oil Company (Indiana) family must have a thorough, broad-gauged understanding of the benefits to be derived from organization.

In addition each must have an intensive training which makes him a specialist, and enables him to complete his part of the work and pass it on to others without delay or lost motion.

The result is a family of highly trained individuals, tense and keen to render to the public the utmost in service.

But Standard Oil Company (Indiana) organization goes further. To give a single illustration:

When a manufacturer has two machines, identical in construction, but not equal in production, he calls on the Standard Oil Company (Indiana) for expert assistance and advice.

A competent engineer goes over the problem and after thorough investigation, finds the lubricating oil necessary to cope with conditions surrounding the inefficient machine, and to bring it up to full capacity.

Thus does the Standard Oil Company (Indiana) organization extend to industry generally, a service resulting in a combination to promote trade that production may be increased and the utmost in service given to the public.
